CareBenefits Safe Sender Listing

What is a Safe Sender Listing?

A Safe Sender Listing is a set of email addresses and/or IP addresses that your organization considered acceptable to receive emails from. This is also called whitelisting.

Why add CareBenefits to your Safe Sender Listing?

Adding CareBenefits sending email addresses and IP addresses will allow your employees to receive important information from CareBenefits, including important account updates. It will ensure these digital communications reach your employees and not get caught in spam filters.

How do I add CareBenefits to my Safe Sender Listing?

Please provide the following information to your IT department or Email Service Provider.

Domain:

@care.com
